1. INTRODUCTION

Event tourism in recent years has seen immense growth due to the awakening by destinations that events have a potential to support tourism by raising awareness of tourism product offerings and brand image of the host destination in an ever-increasing competitive global tourism industry (Getz, 2008). Events within the tourism industry relate to meetings, incentives, special events (MISE). This is a type of tourism in which large groups converge at a particular place for a common purpose. Business tourism has now received focus and acknowledgement of its potential contribution to increasing tourist volumes and revenue in destinations. Currently South Africa is ranked 32nd largest international events destination; this is according to International Congress and Convention Associations (ICCA) 2014. South Africa is to host over 200 international conferences between 2016 and 2020. Cape Town ICC alone contributed R2.99bn. The North West Department of Tourism in 2016 launched the Provincial Events Tourism Strategy to leverage on the potential events in order to increase the number of tourist in the North West. Hence it is important to create a baseline for monitoring the performance, development, challenges and opportunities of MISE in the province. For instance, delegates while attending an event they incur expenses related or even unrelated to the event within the host destination. Meaning they can also engage in leisure activities in addition to their event. In addition, the groups become ambassadors of the event host destination in that they are likely to revisit the destination with family and friends and/or convince friends to visit the destination after the event (Corigliano, 2013). Thereby stimulating tourism economy in the off-peak seasons by increasing volumes of tourist trips and thus reducing problems of seasonality for the tourism industry, create new products, attractions and the expansion of destination portfolio, encouraging visitors to spend more time and more money in a destination (Getz, 2010).

Research literature has proved that events can play a key role to catalyze development of infrastructure that will ultimately benefit both local communities and tourism development. This is seen in the case of major events such as the Olympics and FIFA world Cup Tournaments (Getz, 2010). Other economic and social benefits aligned to events includes job creation, increases in trade through the promotion of international collaborations, attracts investments by promoting the profile of hosting cities/regions, spreads knowledge and enhances innovation and creativity (Corigliano, 2013).

South African tourism industry has also jumped into the wagon to invest in MISE industry. Minister Derrek Hanekom reported that South Africa will host over 200 international conferences between 2016 and 2020, attracting around 150,000 delegates and injecting more than R3.1bn into the economy because South Africa is receiving appreciation as a world class business destination (South African Tourism).

According to the International Congress and Convention Association's (ICCA) 2014 country and city rankings, South Africa is ranked 32nd largest international events destination. Cape Town International Convention Centre contributed R2.99bn to the economy, and over R1bn of Western Cape revenues between 2003 and 2013, while the Convention and Events Bureau (a division of the Johannesburg Tourism Company), announced in 2011 that the city had been selected to host conferences estimated to bring \$28.5m in direct and indirect economic benefits.

In 2016 the North West Department of Tourism launched the Provincial Events Tourism Strategy to leverage on the potential of events to increase tourist volumes to the North West as a destination. Business tourism statistics of foreign arrivals in the North West were at 535 000 in 2013, 459 000 in 2014 and 525 000 for 2015. Consequently the department is commissioning a North West MISE Monitor Survey to create a baseline for monitoring performance, development, challenges and opportunities of the MISE industry within the province.

The projects will at large benefit of the tourism establishment owners, which also leads to indirect and direct employment within the industry. Once there is factual information, as a Province we can bid for events based on the capacity. Most importantly we are creating a database for the Province, which is beneficial for all. This information will also assist potential investors, considering there is a lack of information. Other beneficiaries will be the Tourism Board as well as Directorates such as Tourism growth.

2.2. Goals of the Research

2.2.1 To measure the size of the MISE sector within the North West Province (NWP) through the level of investment in MISE facilities, employment, & the number of businesses involved in the meetings industry.

2.2.2 To determine the total number of MISE events that were held in NWP,

2.2.3 To measure delegate expenditure: fees, (total expenditure and average daily expenditure and breakdown by products),

2.2.4 To identify the challenges and opportunities in the NWP MISE industry

2.2.5 To forecast demand levels for MISE facilities /products in NWP in the future

2.3. Specific Objectives

1.4.1 To profile the events hosted and delegates (Domestic / International).

1.4.2 To determine the number of events that had been planned and hosted in NWP during the 1 January 2016 to December 2017 period. (demand levels)

1.4.3 To quantify the capacity levels of the NWP to host events.

1.4.4 To determine the challenges and opportunities posed to the sector in NWP (i.e. technology, slowed economic conditions)

1.4.5 To measure investment levels towards MISE facilities during 2015 to 2017 and future investment plans for 2018 to 2020.

1.4.6 To measure total economic contribution resulting from MISE tourism in NWP during 2016 to 2017 period.(Revenue, employment)

2.4. Scope of Work

The research study must cover the following two types of measures:

2.4.1 Supply Side

Supply side measures of the industry include such variables as businesses which provide meetings services as their primary activity using the International Standard Industrial Classification (ISCI), and other relevant businesses that provide such services as a secondary activity, e.g. hotels. It is also important to include capacity levels of event facilities, Revenue generated, expenditure costs/investment by facilities, and employment.

2.4.2 Demand Side

Demand side measures include such variables as number of events planned and hosted, numbers of participants, and length of meetings, location travelled from to get to the meeting and number in the travelling party. All these variables compounded can be used to determine the profile of events hosted by the province and also expenditure by participants at events on identified services supplied by the meetings industry or other industries.

2.5. Timelines for the Research Project

The research project is expected to be brought to completion in four months after receipt and approval of concept document by the department. Refer to the below table.

Phases	Payment Percentages	Timelines
Phase 1: Conceptualization/ Inception report & Questionnaires	15%	2 November 2018
Phase 2: Data collection	35%	21 December 2018
Phase 3: Data Capturing & Analysis	20%	31 January 2019

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
